Informed Consent

The nature of the chiropractic manipulation: I will use either my hands an instrument or both to move the joints of your body; this may result in an audible “pop” or “click”.

The material risks inherent in an adjustment: As with any healthcare procedure, there are certain complications that may arise during a chiropractic manipulation. This may include: strains, dislocations, fractures, disc injuries and stroke. This list is not all inclusive.

The probability of those risks: Fractures are rare and can result from an underlying weakness in the bones. The other complications listed are considered rare. One source states that stroke is a possible occurrence in 1/1,000,000 cases or higher, even so we employ tests during our examination to identify if you may be susceptible to that kind of injury.

Ancillary treatments recommended: Ice, Moist Heat Packs, Ultrasound, Electrical Muscle Stimulations, Stretching/Strengthening Exercises, Massage Therapy, Diathermy, Laser, Neuromuscular Re-education, Graston Technique and Decompression Spinal Traction

Risks involved with the recommended ancillary treatments:

Ice, Heat and Electrical Muscle Stimulations (EMS) can cause burning. The EMS can cause skin irritation underneath the active pads. Stretching/Strengthening Exercises and Decompression Spinal Traction can cause temporary post-treatment soreness or reflex muscle spasms. Graston technique can cause mild bruising and skin redness. This list is not all inclusive.

Other treatment options for your condition can include: Medical care with prescription drugs, self management with over-the-counter medication, rest, and/or surgery. There are material risks inherent in each of these options including but not limited to: addiction to medication, side effects of medication, improper self dosages and surgical risks including complications from either the procedure and the anesthesia.

DO NOT SIGN UNTIL YOU HAVE READ AND UNDERSTAND THE ABOVE

I have read or have had read to me the above explanation of the chiropractic adjustment and the related treatment. I have discussed it with the doctor and have had my questions answered to my satisfaction. By signing below I state that I have weighed the risks involved in undergoing treatment and I have decided that it was in my best interest to undergo the treatment recommended. Having been informed of the risks, I hereby give my consent to treatment.
